✓

Attribute commits with collaborators easily

Quickly add co-authors to your commit. Great for pairing and excellent for sending a little love/credit to that special someone who helped fix that gnarly bug of yours. See the attribution on the history page, undo an accidental attribution, and [see the co-authors on github.com](https://github.com)

Checkout branches with pull requests and view CI statuses

See all open pull requests for your repositories and check them out as if they were a local branch, even if they're from upstream branches or forks. See which pull requests pass commit status checks, too!

Syntax highlighted diffs

The new GitHub Desktop supports syntax highlighting when viewing diffs for a variety of different languages.

Expanded image diff support

Easily compare changed images. See the before and after, swipe or fade between the two, or look at just the changed parts.

Extensive editor & shell integrations

Open your favorite editor or shell from the app, or jump back to GitHub Desktop from your shell. GitHub Desktop is your springboard for work.

Community supported

GitHub Desktop is [open source](#) now! Check out our roadmap, contribute, and help us make collaboration even easier.
